

AI Extensibility Lab

Building Custom agents with Copilot Studio

You need this link:

AI stack in a day

1

Level 1 – Follow the instructions and build the UFO agent.

2

Level 2 – With what you know, make your own agent and attach it to your website/knowledge!

3

Level 3 – Think about your own idea! Can you morph this into something else?

Level 1: Follow the instructions

<https://make.powerapps.com/>

If you use your own environment!!!

If you use the demo tenant, skip this bit!

+ New table Import

Create new tables

Select "Tables" and then select to "Create a new Table".

Table (advanced properties)

Create a virtual table

Copilot

AI will generate tables and relationships based on your prompt.

Start with a blank table

Create with Excel or .CSV file

Create with SharePoint list

[New chat](#)

Agent 2

Expert assistant for UFO and astrobiology questions, providing reliable information and helping users track and log UFO sightings.

Ask about UFO evidence

What is the most credible evidence for UFOs?

Log a UFO sighting

I saw something unusual in the sky. How can I log this sighting?

Astrobiology basics

What is astrobiology and what does it study?

Report a sighting

How do I report a UFO sighting to an official database?

Recent UFO news

Are there any recent discoveries related to UFOs or extraterrestrial life?

Famous UFO cases

Can you tell me about a famous UFO sighting?

Type your message

I suggest the name "UFO Tracker". Would you like to use this name, or do you have another name in mind? Please confirm your choice.

[YAH I Like UFO Tracker!](#)

The agent's name has been set to "UFO Tracker".

Now, let's refine what UFO Tracker will do. Could you describe any specific tasks or responsibilities you want this agent to handle? For example, should it provide scientific explanations, log sightings with details, or offer resources for further reading? Please share any details you'd like included.

I need the agent to be very fun yet professional when it responds to users. It should not share any legal information, Political bias or life / therapy type advice. Its soul goal is to help geeks track ufo info and log sightings. The agent should offer up loads of resources to users from certain recommended sites and stored documents but should NEVER go outside of its stored knowledge.

Look for the Dataverse connector and then select when a new row is added.

Classification: Public

The screenshot shows the Copilot Studio interface with the 'Designer' tab selected. On the left, there's a sidebar with icons for Home, Agents, Flows, Tools, and a three-dot menu. The main area has tabs for Agent flows, Overview, Designer (which is active), Activity, and Analytics. At the top right, there are environment settings (EPPC US Build), a gear icon, a question mark, and a 'CH' button. Below the tabs, there are buttons for Copilot, Version history, Flow checker, Test, Save draft, and Publish. A central modal window titled 'Add a trigger' is open, featuring a search bar with 'dataverse' typed in, a filter bar with 'All', 'Built-in', 'Standard', 'Premium', and 'Custom' options, and a sorting bar with 'A-Z'. The results are divided into two sections: 'Microsoft Dataverse' and 'Microsoft Dataverse (legacy)'. Under 'Microsoft Dataverse', the 'When a row is added, modified...' trigger is highlighted with a red box. Under 'Microsoft Dataverse (legacy)', the 'When a row is selected' trigger is shown. A large blue callout box in the bottom-left corner of the modal contains the text: 'Look for the Dataverse connector and then select when a new row is added.' The background of the main workspace is a light gray grid.

Hello, tell me about Aliens

What are aliens? Provide information ... 8.16s
Knowledge

Complete

Go ahead and ask your agent a question!

What are aliens? Provide inf... Complete X
Knowledge

Query

What are aliens? Provide information about extraterrestrial life, UFO sightings, and astrobiology.

Response

Aliens and Extraterrestrial Life

- Aliens typically refer to life forms that originate from places beyond Earth. The scientific term for the study of life beyond our planet is **extraterrestrial life**. So far, no scientifically supported evidence of extraterrestrial life has been discovered, but the search continues actively in the field of astrobiology. NASA astrobiologists are dedicated to answering the profound question: Is there life beyond Earth? They explore planets, moons, and other celestial bodies for signs of life, focusing on both large organisms and microbial life, which is found nearly everywhere on Earth. The definition of habitable environments is expanding as we discover more about our universe [\[1\]](#).

UFO Sightings

- UFO stands for Unidentified Flying Object. While UFO sightings are often reported by individuals who observe objects in the sky that they cannot identify, these sightings are not direct evidence of extraterrestrial life. Scientific investigations into UFOs aim to determine whether these phenomena have natural, technological, or potentially unknown origins. NASA and other organizations continue to study and catalog such sightings, but no confirmed link to alien life has been established [\[3\]](#).

...

Edit knowledge

Aliens are hypothetical life forms that originate from places beyond Earth—think cosmic neighbors, but with a lot more mystery! The scientific hunt for aliens falls under the field of astrobiology, which explores the origin, evolution, and future of life in the universe. Astrobiologists search for signs of life on planets, moons, and even exoplanets (planets orbiting other stars), using everything from chemistry to planetary science to answer the big question: Are we alone? So far, Earth is the only confirmed life-bearing planet, but the search is far from over [\[1\]](#) [\[2\]](#).

UFO sightings (Unidentified Flying Objects) are often reported by people who spot something strange in the sky. While these sightings spark curiosity and plenty of wild theories, there's no confirmed evidence linking them to extraterrestrial life. Scientists and organizations like NASA investigate these phenomena to determine if they have natural, technological, or unknown origins, but the mystery continues [\[3\]](#).

In summary: Aliens are still a cosmic "maybe," UFOs are fun to track and log, and astrobiology is the science that keeps the search for life beyond Earth exciting and ongoing! If you want to log a sighting or dive deeper into any of these topics, just let me know!
